Oldtidsagre i Danmark

**Bornholm**

Viggo Nielsen

A presentation of the results of productive investigations of ancient field systems on Bornholm: A remarkable contribution to our knowledge of prehistoric agriculture.

Oldtidsagre i Danmark

**Sjælland, Møn og Lolland-Falster**

Viggo Nielsen

As a young archaeologist the author embarked on a study of Iron Age agriculture. In the course of his studies he began to survey ancient field systems which were still visible in the landscape, notably in old forests and woodland. This book presents the results of more than 50 years of investigations, including studies of the extensive field systems in Næsbyholm Storskov, near Sorø, and in Geelskov and Rude Skov, north of Copenhagen.

Illerup Ådal
– archaeology as a magic mirror
Jørgen Ilkjær

Around AD 200, 1000 Norwegian warriors launched an attack on Eastern Jutland. They were, however, emphatically defeated. Their swords, shields and other equipment were subsequently hacked to pieces then offered in a lake near Skanderborg. The book provides an insight into previously unknown and very surprising aspects of life in the Iron Age.

*Submerged Mesolithic Settlements in Denmark*

*Søren H. Andersen*

The submerged settlement in Tybrind Vig, West Funen, has yielded many remarkably preserved artefacts made of organic materials dating from the end of the Mesolithic period. These provide us with important new data on the wooden tools and equipment of the time. The finds also include dug-out boats and paddles with elaborately carved patterns, as well as the remains of textiles, cord and twine.

**Tvillum Kloster**

Hans Krongaard Kristensen

The Augustinian Abbey in Tvillum was abolished in 1537 – just after the Reformation. The church was converted into a parish church, while the abbey buildings were demolished and the churchyard expanded over the site. Through a series of targeted excavation campaigns in 1990–93, an overview was obtained of the placing of the abbey buildings in the main complex and a couple of other structures to the south of this.

Dolmens in Denmark
*Architecture and Function*

Palle Eriksen & Niels H. Andersen

Dolmens are some of Denmark’s oldest and most imposing ancient monuments. These more than 5000 year old structures stand as intriguing testaments to the architectural skills of Stone Age people in a distant past. Based on new and well-founded knowledge, a comprehensive account is given of the origin and function of dolmens, their original appearance and their later development.

Dwellings, Identities and Homes
*European Housing Culture from the Viking Age to the Renaissance*

Mette Svart Kristiansen & Kate Giles (eds.)

Twenty articles, written predominantly by medieval archaeologists, present the results of theoretical, methodological and empirical studies of housing, ways of life and social background in Europe, particularly during the period AD 800-1600. This book highlights the need for comparative transnational investigations and detailed regional studies.

Aggersborg i vikingetiden
*Bebyggelsen og borgen*

Else Roesdahl, Søren M. Sindbæk & Anne Pedersen (eds.)

Together with other Danish ring fortresses, such as Trelleborg and Fyrkat, Aggersborg played a central role in the Viking Age. The fortress occupied a strategically important position and offered broad views across the Limfjord. This is an account of the extensive excavations of the fortress and the settlement that preceded it. Based on the findings, an insight is given into Danish history during this period of great change and upheaval, and into Denmark’s political and religious links with the rest of Europe at this time.

Arkæologi på havbunden
Historien om udgravningen af en stenalderoplads i Tybrind Vig
Hans Dal
Three decades ago a group of amateur underwater archaeologists took part in the first ever large-scale excavation of a Stone Age settlement on the seabed in Tybrind Vig, Western Funen. This book describes how the group developed or invented the necessary technology, equipment, approaches and methods. It also gives an account of daily life on the excavation and practical tasks undertaken in the large and exceptionally well-organised excavation camp.

Lejre bag myten
*De arkeologiske udgravninger*

Tom Christensen

The history of the kingdom of Denmark begins in Lejre on Zealand. According to sagas and annals, it was here that the Skjoldung kings had their royal residence. Archaeological investigations have shown that Lejre was the headquarters of a magnate or king in the Late Iron Age and Viking Age (AD 500-1000). This book deals with the halls, graves and finds, including hoards, which help draw a new picture of this fabled locality.

Urban Consumption

Tracing urbanity in a Danish town 800-1800. An archaeology of Aarhus

Jette Linaa

Based on analyses of archaeological finds from Aarhus and its environs, the development of the town is followed from the Viking Age to the mid-19th century. Central to this is the special way of life that turns urban dwellers into citizens. In the process, the town’s communities and their interfaces are unveiled: between town dwellers and country people, upper and lower urban social classes and new immigrants and Aarhus natives.

Medieval mendicant monasteries in Denmark
The building culture of the Franciscans and Dominicans
Morten Larsen

The mendicant orders arose in the 13th century and achieved great significance for the development of medieval monasticism. These orders were an integral part of Danish society for three centuries, and by the end of the Middle Ages there were mendicant monasteries in most Danish market towns – often in the form of extravagant monastic complexes. These complexes, and the history of their buildings, are the subject of this book which, with a point of departure in standing monuments and archaeological investigations, examines the building culture of the mendicant orders.

Sea-Level Change in Mesolithic southern Scandinavia
Peter Moe Astrup

As the ice began to melt about 20,000 years ago, a sustained rise in sea level took place that lasted for millennia. This resulted in the settlements of people who had lived in the former coastal areas gradually becoming inundated by the sea. As a result, our perception of the Maglemose culture is exclusively based on finds from settlements that were located in the interior, far away from the coast at that time. In this book, the author investigates the role played by the coast and coastal resources in the lives of people in Maglemose times, and how they adapted to the changing sea level.

Mariager Abbey

Hans Krongaard Kristensen

In the Middle Ages, Mariager Abbey was the largest buildings complex in Jutland. Over time, the church was greatly reduced in size and most of the abbey buildings disappeared, and it can be difficult today to appreciate the extent of this once enormous structure. Using evidence from written sources, archaeological excavations and old drawings, the book presents a picture of this labyrinthine Bridgettine Abbey.

The Maussolleion at Halikarnassos
Reports of the Danish Archaeological Expedition to Bodrum
Between 1966 and 1977, Professor Kristian Jeppesen of Aarhus University re-excavated the Mausoleum at Halicarnassos, one of the seven wonders of the ancient world, located in present-day Bodrum, Southwest Turkey. The results of these investigations are presented in seven volumes.

1. The Sacrificial Deposit
Kristian Jeppesen, Flemming Højlund & Kim Aaris-Sørensen
In front of the entrance to King Mausolos’ grave chamber a votive layer was discovered containing the remains of scores of oxen, calves, sheep/goats, lambs, hens, doves and hen’s eggs. The animals had been butchered according to very specific rites, which have been reconstructed on the basis of studies of cut- and chopping marks on the bones, in conjunction with written accounts of the sacrificial rituals.

Retail price 175.00 DKK. Members’ price 120.00 DKK.

2. The Written Sources and their Archaeological Background
Kristian Jeppesen & Anthony Luttrell
A presentation and discussion of the ancient Greek and Latin sources describing the Mausoleum at Halicarnassos as it was in the first centuries following its construction. The mausoleum’s later history and its use as a stone quarry by the crusaders who built a fortress at Bodrum are also discussed.

Retail price 300.00 DKK. Members’ price 200.00 DKK.
3. The Maussolleion Terrace and Accessory Structures 1-2
   Poul Pedersen
   One of the main results of the Danish excavations was the discovery of the terrace on which the mausoleum was constructed and which formed part of the town plan of the ancient Halicarnassos. Comparative studies of coeval terrace structures from Southwest Turkey are also presented.

   Retail price 400.00 DKK. Members’ price 275.00 DKK.

4. The Quadrangle
   Kristian Jeppesen
   An account of the new discoveries of the mausoleum’s foundations and traditional evidence relating to King Mausolos’ grave chamber and grave furnishings.

   Retail price 300.00 DKK. Members’ price 200.00 DKK.

5. The Superstructure
   Kristian Jeppesen
   Summaries and conclusions relating to the author’s extensive studies of the architectonic, sculptural and literary sources relating to the mausoleum’s superstructure.

   Retail price 300.00 DKK. Members’ price 200.00 DKK.

6. Subterranean and pre-Maussollan structures on the site of the Maussolleion
   Jan Zahle & Kjeld Kjeldsen
   Descriptions of a drain intended to prevent flooding of the mausoleum’s grave, an aqueduct running through the area and burial structures that predate the mausoleum.

   Retail price 350.00 DKK. Members’ price 235.00 DKK.

7. The Pottery
   Ceramic Material and Other Finds from Selected Contexts
   Leif Erik Vaag, Vinnie Nørskov & John Lund

Failaka/Ikaros. The Hellenistic Settlements
2. The Hellenistic Pottery from Failaka 1-2
Lise Hannestad

An account of the pottery from the Danish excavations in the Hellenistic fortress (F5) on Failaka, from c. 300 BC to c. 100 AD. Apart from a few sherds of Greek origin, the pottery comes from two main traditions, with the majority being closely linked to pottery from Southern Mesopotamia and Southwestern Iran. An overview is also given of pottery from other Near East regions during the same period and of the interaction between Greek and local traditions.

Vol. 2: Catalogue and plates.

3. The Sacred Enclosure in the Early Hellenistic Period
Kristian Jeppesen

Excavations of Tell F5 on Failaka by Danish archaeologists in 1958-1963 revealed a small fortress with defensive walls surrounded by a moat. The main building inside the fortress is a small temple in Greek style with some elements of Persian origin. This book is the primary publication of this temple and an additional later temple, together with their altars. A chapter and two appendices discuss the so-called Ikaros inscription found here, literary testimonia and other epigraphical finds from the site.

2. The Bronze Age Pottery

**Flemming Højlund**

Pottery excavated in Tells F3 and F6 on Failaka, Kuwait in 1958-1963 is divided into a local Barbar and a Mesopotamian pottery tradition and classified into 100 morphological types and eight ware types. Based on the typology and stratigraphic data, seven periods covering most of the 2nd millennium are defined.

Retail price 250.00 DKK. Members’ price 170.00 DKK.

3. The Bronze Age Architecture

**Poul Kjærum & Flemming Højlund**

As part of the Danish expeditions to the island of Failaka in Kuwait, excavations were carried out at several tell sites between 1958 and 1963. The main sites were Tell F3, with private dwellings, and Tell F6, with a large production and storage building. The phasing of the excavated house remains is presented and an explanation is given for their association with a trading place from the second century BC.
